## TECHNICAL DATA- TILE

| | technical characteristics | test method | required values | result |
|---|---|---|---|---|
| | water absorption | ISO 10545-3 | ≤0.5% | ≤0.08% |
| | breaking strength | ISO 10545-4 | ≥1300N | 2573 |
| | bending strength | ISO 10545-4 | ≥35N/mm2 | 52.8 |
| | chemical resistance | ISO 10545-13 | Minimum GB | GA |
| | staining resistance | ISO 10545-14 | Minimum Class 3 | class 5 |

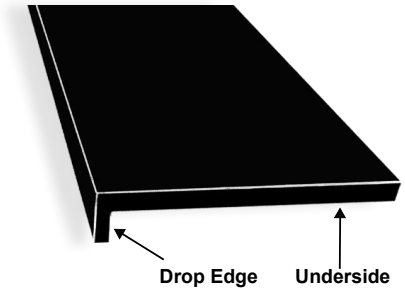

Variation is an inherent property of tiles and stone. Sizes are nominal and may include a joint.

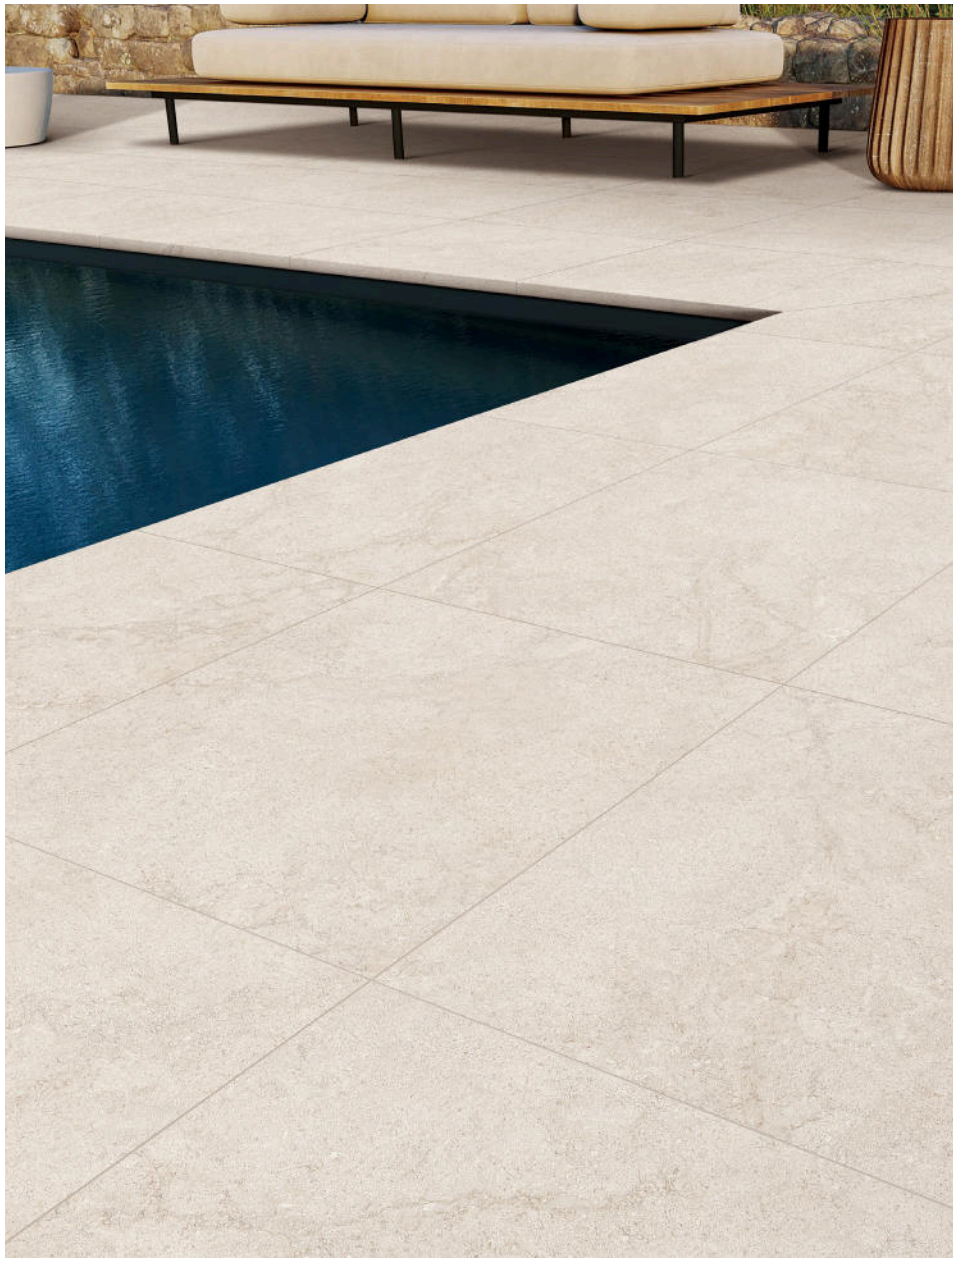

# **EDISON** SERIES

**Important: When installing Edison Paver Coping tile, the underside and 16mm drop edge must be adhered to the substrate.**

When applying full adhesion to paver coping, it is essential to ensure proper surface preparation, including cleaning and drying the surfaces to be bonded. The installer shall ensure that all porcelain pavers and coping are installed in accordance with the applicable Australian Standards and the adhesive manufacturer's instructions. The adhesive used should be appropriate for the materials being bonded and should be applied according to the manufacturer's instructions. Full adhesion can provide a strong and durable bond between the coping pavers and the substrate.

Paver coping is not suggested for fiberglass pools due to potential issues with flexibility, weight, compatibility, and installation challenges.

## TECHNICAL DATA- PAVER

| | technical characteristics | test method | required values | result |
|---|---|---|---|---|
| | water absorption | ISO 10545-3 | ≤0.5% | ≤0.04% |
| | breaking strength | ISO 10545-4 | - | 11427 |
| | bending strength | ISO 10545-4 | - | 45.60 |
| | chemical resistance | ISO 10545-13 | Minimum GB | GA |
| | staining resistance | ISO 10545-14 | Minimum Class 3 | class 5 |

Variation is an inherent property of tiles and stone. Sizes are nominal and may include a joint.
